Series Diamant

LINEA Collection

LINEA Collection, with new unique "dimpled" handle to ensure better grip, is created to further complement our popular LINE Collection range of faucets.

Maintaining the all-brass material production, with modern minimalist design, LINEA Collection articles are available in the latest colour trend with finishes that are done by electroplating and the latest physical vapour deposition (PVD) technology. PVD is a vacuum coating process.

PVD opens up a range of new colours available, which are more durable as compared to other processes like painting and powder coating.

Series DIAMANT

Diamant series embodies the slim minimalist design with updated distinctive diamond shape patterns on the handle, to add more dazzle in the bathroom.
Friendlier to the environment, Diamant series is designed to be slender. Its svelte spout, achieved by joining 2 slim tubes perfectly and seamlessly. The overall slim profile reduces raw material usage. Fitted with an aerator that mixes water and air to produce bubbly water flow, reducing water usage.

Diamant series faucets are produced fully in brass, and available in electroplated chrome, matt black and other stylish surface finishes achieved by physical vapour deposition (PVD): brushed champagne, brushed nickel and brushed gunmetal. Both electroplating and PVD provide durable surface protection that ensures the long life of the faucet.
